

DealFlow

Getting Started Guide

Everything you need to know to run your real estate business from one screen.

Welcome to DealFlow

DealFlow is your mobile-first command center for managing real estate transactions. Whether you're at your desk or standing in a driveway between showings, everything you need is right here.

This guide walks you through the seven core things you'll do every day. It takes about 10 minutes to read — and after that, you'll know the app inside and out.

What's in This Guide

Step	What You'll Do	Time
1	Add your first deal	2 min
2	Use your checklist	1 min
3	Log a communication	30 sec
4	Track your leads	2 min
5	Schedule a showing	1 min
6	Share the client portal	1 min
7	Check your intelligence	1 min

Step 1

Add Your First Deal

Takes about 2 minutes per deal

Every transaction starts with a deal. Here's how to add one:

- Tap the gold + button (bottom right on mobile, top right on desktop)
- Enter the property address and sale price

- Choose your role — **Buyer's Agent** or **Listing Agent**
- Enter your commission percentage — DealFlow calculates the dollar amount automatically
- Select the current phase — for listings start with **Listed**, for buyer deals start with **Searching**
- Add the buyer and seller contact info
- Tap **Save Deal**

Tip: You can edit any deal at any time — tap Edit Deal on the deal detail page. Nothing is locked in.

Step 2

Use Your Checklist

Never miss a deadline again

Every deal has a pre-built checklist for each phase. Open any deal and tap the **Checklist** tab.

- Items are organized by phase — Inspection, Appraisal, Title, etc.
- Tap any checkbox to mark it complete — it strikes through automatically
- Tap again to uncheck it if you made a mistake
- You can check items in any order — real estate doesn't always follow a perfect sequence
- Set due dates on individual items — overdue items turn red as a reminder
- The **Next Deadline** card on the right panel always shows what's due next

Tip: When you change a deal's phase the checklist automatically shows the items for that phase. Your completed items stay checked.

Step 3

Log a Communication

15 seconds from any screen

Every call, text, and email tied to a deal gets logged here. Never lose a conversation again.

Quick Log (fastest method):

- Tap the navy lightning bolt button (above the gold + on mobile, in the top bar on desktop)
- Choose the type: Call, Text, Email, In-Person, or Note
- Select the deal from the dropdown
- Type a quick summary of what was discussed

- Tap Save — done in 15 seconds without leaving your current screen

From the Deal Detail page:

- Open a deal and tap the **Communication** tab
- Fill in the log form at the top and tap Save Log Entry
- All entries appear below, newest first, with timestamp

Tip: Log calls immediately after hanging up — while the details are fresh. The Quick Log button is designed for exactly this moment.

Step 4

Track Your Leads

Never lose a prospect again

The Lead Tracker is where prospects live before they become active deals.

- Tap **Leads** in the navigation (hamburger menu on mobile, sidebar on desktop)
- Tap **+ Add Lead** to log a new prospect
- Set their temperature — **Hot** (ready now), **Warm** (interested), or **Cold** (early stage)
- Track where they came from — Zillow, referral, open house, sign call, social media
- Set a follow-up date — you'll get reminded when it arrives
- When they're ready tap **Convert to Deal** — their info pre-fills the deal form automatically

Check the **Sources** tab to see which lead sources generate the most business for you.

Tip: Add every prospect — even cold ones. Your Sources leaderboard will show you where to focus your energy over time.

Step 5

Schedule a Showing

And notify your agent network

Schedule showings and automatically notify other agents whose clients might be interested.

Schedule from a deal:

- Open a deal and tap **Schedule Showing** on the Overview tab
- Fill in the date, time, and client name

- Select agents from your network to notify via email
- Tap Save — the showing is booked and emails go out automatically

Build your agent network first:

- Go to **Agent Network** in the navigation
- Add the agents you regularly work with — name, email, brokerage
- They'll appear as options whenever you schedule a showing

Showings also appear on your **Calendar** as cyan events.

Tip: After a showing date passes, DealFlow will prompt you to log post-showing notes. This automatically creates a communication log entry on the deal.

Step 6

Share the Client Portal

Make your clients feel like insiders

Give your buyers and sellers their own private window into the transaction. No more 'what's happening?' texts.

- Open a deal and tap the **Portal** tab
- Tap **Create Buyer Portal** or **Create Seller Portal**
- Copy the link and send it to your client via text or email

What your client sees:

- Current transaction phase with a visual progress bar
- Deal timeline showing completed and upcoming steps
- Their personal to-do list — tasks you assign them
- Your contact info with one-tap call and email

Assign tasks to your client from the Portal tab — they check them off from their side and you get notified.

Tip: Use the pre-built task templates — common buyer and seller tasks are already written. Just tap 'Add Common Tasks' and select what applies.

Step 7

Check Your Intelligence

The Intelligence section is your financial dashboard and market pulse in one place.

Commission tab:

- See pending commission across all active deals
- See earned commission year to date
- 12-month bar chart of your earnings history

Insights tab:

- Earnings overview — this week, month, year, or all time
- Career totals — lifetime volume and commission
- Pipeline projections — what closes in the next 30, 60, 90 days
- Past client re-engagement alerts — who might be ready to buy or sell again

Market tab:

- Current 30-year mortgage rate and week-over-week change
- Rate impact on your active buyer deals
- Market pulse — Fed funds rate, home price index, unemployment
- Upcoming Federal Reserve meeting calendar

Tip: Check the Insights tab every Monday morning. The pipeline projections and past client alerts help you plan your week before it starts.

Tips for Field Use

Hamburger Menu

On mobile tap the three lines (☰) in the top left to access all sections — Leads, Clients, Intelligence, Calendar, Agent Network, Settings.

Quick Log Shortcut

The navy lightning bolt button is always visible. Tap it the moment you hang up a call — before you forget what was said.

Add to Home Screen

Open dealflownow.net in Safari (iPhone) or Chrome (Android), tap Share, and select 'Add to Home Screen.' DealFlow becomes an app icon on your phone.

Calendar View

The Calendar shows ALL your important dates in one place — closing dates, checklist deadlines, lead follow-ups, and showings. Check it every morning.

Phase Changes

When a deal moves to a new phase — tap Edit Deal and update the phase. The checklist and timeline update automatically.

Document Upload

On the Documents tab you can take a photo directly with your phone camera. Snap inspection reports, contracts, or anything deal-related on the spot.

Offline Use

DealFlow works without internet and syncs when you reconnect. Safe to use in basements, rural areas, or anywhere with no signal.
