

DealFlow

Product Development Roadmap

dealflownow.net

This document outlines the complete development roadmap for DealFlow — from the current live product through the full Intelligence platform. Each phase builds on the previous, adding features in order of customer value and technical dependency.

Phase 1

This Week

Polish & Stabilize

Core — \$15/mo

Get everything bulletproof before adding new features. A stable foundation is worth more than any new feature.

- Fix Text button visibility on mobile contact cards
- Test every screen on phone and desktop — document every issue
- Fix all bugs found in one Claude Code session
- Collect first feedback from realtor beta contact
- Deploy all fixes to dealflownow.net

Phase 2

Week 2

Lead Tracker

Pro+ — \$25/mo

Add the top of the funnel. Most agents lose business because they have no system for tracking prospects before they become active deals.

- New Leads section in navigation
- Log prospects — name, contact, source, budget, temperature rating
- Hot / Warm / Cold rating system with visual indicators
- Follow-up date reminders and alerts
- One-tap convert lead to active deal — all info carries over
- Source tracking — Zillow, open house, referral, sign call, social
- Referral leaderboard — top sources by deals closed and commission earned

Phase 3

Week 3

Client Portal

Pro — \$20/mo

Give buyers and sellers their own private window into the transaction. Reduces 'what's happening?' calls and makes agents look like the most organized professional their client has ever worked with.

- Unique login link generated per deal — agent shares with client
- Client sees transaction status, phase progress, closing countdown
- Client to-do list — agent assigns tasks, client checks them off

- Agent notified when client completes a task
- Simple message thread between agent and client
- Stripe updated with Pro tier payment link at \$20/month

Phase 4

Week 4

Lender Directory & Smart Matching

Pro+ — \$25/mo

Agents get burned by bad lenders constantly. DealFlow learns which lenders perform best for which buyer profiles and surfaces the right recommendation at the right moment.

- Lender contact database per agent
- Rate lenders after each deal closes — speed, communication, issues
- Buyer profile data — credit range, loan type, income type, down payment
- Smart matching — suggest best lenders based on agent's own history
- Featured lender placement (future revenue stream for lenders)

Phase 5

Week 5–6

Business Intelligence Dashboard

Pro+ — \$25/mo

Turn DealFlow from a transaction manager into a full business performance tool. Every agent wants to know where their business came from, what they earned, and what the next 90 days look like.

- This Week / Month / Year / All Time earnings toggle
- Total sales volume and average commission per deal
- Monthly bar chart — last 12 months of earnings
- Career totals — lifetime volume and commission
- 30 / 60 / 90 day projected commission based on pipeline
- Past client re-engagement alerts based on resale timing data
- Top referral source leaderboard with revenue attribution

Phase 6

Week 6–7

Field Agent Power Features

Core — \$15/mo

Make DealFlow the tool agents reach for between every showing, every call, every driveway conversation. Speed and simplicity in the field.

- Quick-log floating button — tap, choose type, pick deal, done in 15 seconds
- Showing scheduler — book showings, reminders, post-showing notes
- Push notifications — deadline alerts, follow-up reminders, closing countdowns
- Document photo upload — snap contracts and reports from phone camera
- Offline mode — works without internet, syncs when connection restored

Phase 7

Week 7–8

Landing Page & Go To Market

Marketing

Turn dealflownow.net into a proper marketing page that converts visitors into paying customers automatically.

- Full landing page at dealflownow.net — headline, screenshots, features
- Pricing table — Core, Pro, Pro+ with Stripe buttons built in
- Testimonials section from beta users
- App moves to app.dealflownow.net
- Post in 10+ realtor Facebook groups
- LinkedIn outreach to Tampa Bay and Florida agents
- Referral partner (realtor contact) starts actively promoting

Phase 8

Month 3+

Intelligence Tier — The Educated Gambler

Intelligence — \$35/mo

The most informed agent in any room wins. DealFlow Intelligence monitors market conditions 24/7 and surfaces personalized signals filtered through each agent's specific clients, deals, and target zip codes. Not generic market news — hyper-personalized intel.

- Daily market briefing — 3-5 personalized signals every morning (Red/Yellow/Green urgency)
- Deal-specific market conditions — competition level, comparable sales, negotiation leverage
- Inventory alerts — when supply drops in a buyer's target zip code
- Interest rate signals — rate cut forecasts and their impact on specific leads
- Neighborhood watch — monitor any zip code for market movement
- Past client re-engagement engine — timing alerts based on resale tenure data
- Weekly market report — auto-generated, agent sends to entire client list in one tap
- Data sources: Zillow API, Freddie Mac rates, Federal Reserve calendar, Census data

Phase 9

Month 4+

Team & Brokerage Tiers

Team \$40/mo · Brokerage \$100/mo

Once the solo agent product is solid, expand upmarket. Brokers are sticky customers — once their whole office is on DealFlow, switching costs are enormous.

- Team plan — up to 5 agents with shared deal visibility
- Assign deals to specific agents within a team
- Brokerage master dashboard — pipeline health across entire office
- Agent performance leaderboard — deals closed, volume, commission YTD
- Revenue forecasting — projected commission for the whole brokerage
- Stalled deal alerts — deals that haven't moved in 30+ days
- Lender sponsorship platform — featured placement revenue stream
- Native iOS and Android app (App Store + Google Play)

Timeline Summary

Timeline	Phase	Key Milestone
This Week	Phase 1	Bug-free, polished V2 live
Week 2	Phase 2	Lead tracker live — Pro+ tier available
Week 3	Phase 3	Client portal live — Pro tier available
Week 4	Phase 4	Lender directory and smart matching
Week 5–6	Phase 5	Business intelligence dashboard
Week 6–7	Phase 6	Field features and push notifications
Week 7–8	Phase 7	Landing page live — serious marketing begins
Month 3	Phase 8	Intelligence tier — \$35/month launching
Month 4+	Phase 9	Team and brokerage tiers
